

Communications Services

Through proven engineering, planning, construction and system integration services, Henkels & McCoy (H&M) safely provides comprehensive infrastructure services to wireline and wireless carrier customers within the communications industry.

H&M works with clients to develop, design, construct, and install future-ready networks that best fits their needs. H&M personnel are consistently trained on the latest installation techniques and applications. H&M connects communications carriers, telephone companies, and wireless providers to their customers – and their customers to the world. H&M's work spans government agencies, educational institutions, large venues, businesses, healthcare companies, and more.

H&M has designed, constructed, and maintained successive generations of telecommunication networks for a wide variety of providers, and continues to support the most advanced communications networks in the country. The company is also equally committed to completing cabling maintenance and repairs for customers throughout North America. With a large national footprint, H&M can complete projects quickly and efficiently, while meeting clients' construction and engineering needs.

Wireline

- Overhead and underground cable construction
- FTTH/FTTX deployment
- OPGW/ADSS cable installation
- Conduit and manhole systems
- Structured cabling – LAN, PON, data centers
- Plowing, trenching, and directional drilling
- Rail mounted cable plow
- Pole removal/replacement
- Make Ready engineering and construction
- Splicing, testing, turn-up
- Feasibility studies and financial projections
- Design and planning
- Project and construction management
- Service and maintenance
- Emergency restoration and storm remediation

Wireless

- DAS/iDAS
- Small Cell deployment
- Fiber backhaul
- Testing and turn-up
- Site engineering
- Design and planning
- Permitting
- Project management
- Service and maintenance
- Emergency restoration and storm remediation

Commitment to Safety

Safety is top priority, and H&M strives for every employee to return home as safely as they arrived to work. It is H&M's goal and daily mission that Nobody Gets Hurt! Safety is at the core of how H&M observes behavior and communicates, investigates, and develops work practices. On a daily basis, H&M follows a safety management system of leading and lagging indicators including coaching observation trends, work site audits, good catches, near-miss reports, corrective action follow-up, total recordable incident rates (TRIR) and days away, restricted duty and transfers rates (DART). Using these indicators, H&M performs trend analyses and program validation of safety performance. Should an incident occur, H&M quickly identifies the root cause and develops corrective practices.

About

Henkels & McCoy is a leading utility construction firm providing construction and maintenance services to communication infrastructure markets throughout North America. Founded in 1923, H&M adapts over 95 years of experience to the dynamic and evolving infrastructure needs of today. H&M has been recognized with an E. I. DuPont Safety Excellence Award.
