

GAS SERVICES

We are an industry-leading, privately held construction and engineering firm that provides innovative utility infrastructure solutions.

CONNECTIONS FOR GROWTH™

Henkels & McCoy (H&M) has a rich history of providing clients comprehensive natural gas services and solutions. A recognized leader in infrastructure services, H&M executes safe, high-quality gas services projects that are delivered on schedule, within budget, and with respect for the environment. H&M is the trusted source to help customers grow and strengthen their infrastructure systems.

Distribution

H&M offers comprehensive natural gas distribution project management and construction services, incorporating the most modern methods of installation for all types and sizes of pipe for residential, commercial, and industrial applications. With decades of field experience and well-established relationships with local municipalities across the country, H&M can provide a full range of innovative solutions for gas distribution projects in even the most challenging surroundings.

Transmission & Additional Services

The firm offers advanced solutions to challenges ranging from pipeline construction to anomaly repair. H&M has the size and expertise to serve clients in the natural gas market with additional services that include gathering line systems, meter and regulation stations, and operator qualification management.

Pipeline Integrity

With proficiency in numerous technical disciplines, H&M delivers pipeline integrity services that reduce environmental risks, enhance productivity, minimize downtime, and maximize operational benefits. Through a variety of precise assessments and engineering services, H&M accurately identifies integrity threats and evaluates anomalies, helping clients optimize assets and manage risk.

Corrosion Control

H&M's full suite of corrosion-related services includes in-depth assessments, construction, training, remediation, and maintenance. Leveraging quality data with project expertise, H&M maximizes corrosion resistance and improves the life and durability of pipelines with techniques such as improved current and sacrificial systems. From high-quality diagnostics to high-performance corrosion mitigation techniques, H&M keeps the country's pipelines flowing smoothly, safely, and efficiently.

Upstream Services

H&M understands the dynamic challenges and innovations that energize the upstream sector. Led by experienced professionals and supported by multi-discipline crews, H&M has the know-how and agility to deliver services that include gathering line construction, pipe fabrication and install, complete site and civil work, and more. The firm has established a respected reputation for working closely with clients and helping them achieve sustainable profitability.

Midstream Services

H&M is dedicated to ensuring the long-term continuity and reliability of the vital midstream segment. As a full-scope provider of construction, integrity, and maintenance services, H&M delivers comprehensive solutions from compressor station construction and horizontal directional drilling, to SCADA and emergency management. The firm's breadth of capabilities also includes federal relocation projects, hydrostatic testing, and tie-in construction.

Downstream Services

Bringing fuel to the marketplace brings unique safety, quality, and regulatory challenges. H&M's downstream services include, but are not limited to, gate station construction, steel and plastic mainline extensions and services, tapping and stopping up to 12", and vacuum excavations. With a focus on safety, functionality, and sustainability, the firm delivers detailed leak detection and repair services, and can perform meter changes-outs and AMR installations with safety and precision.

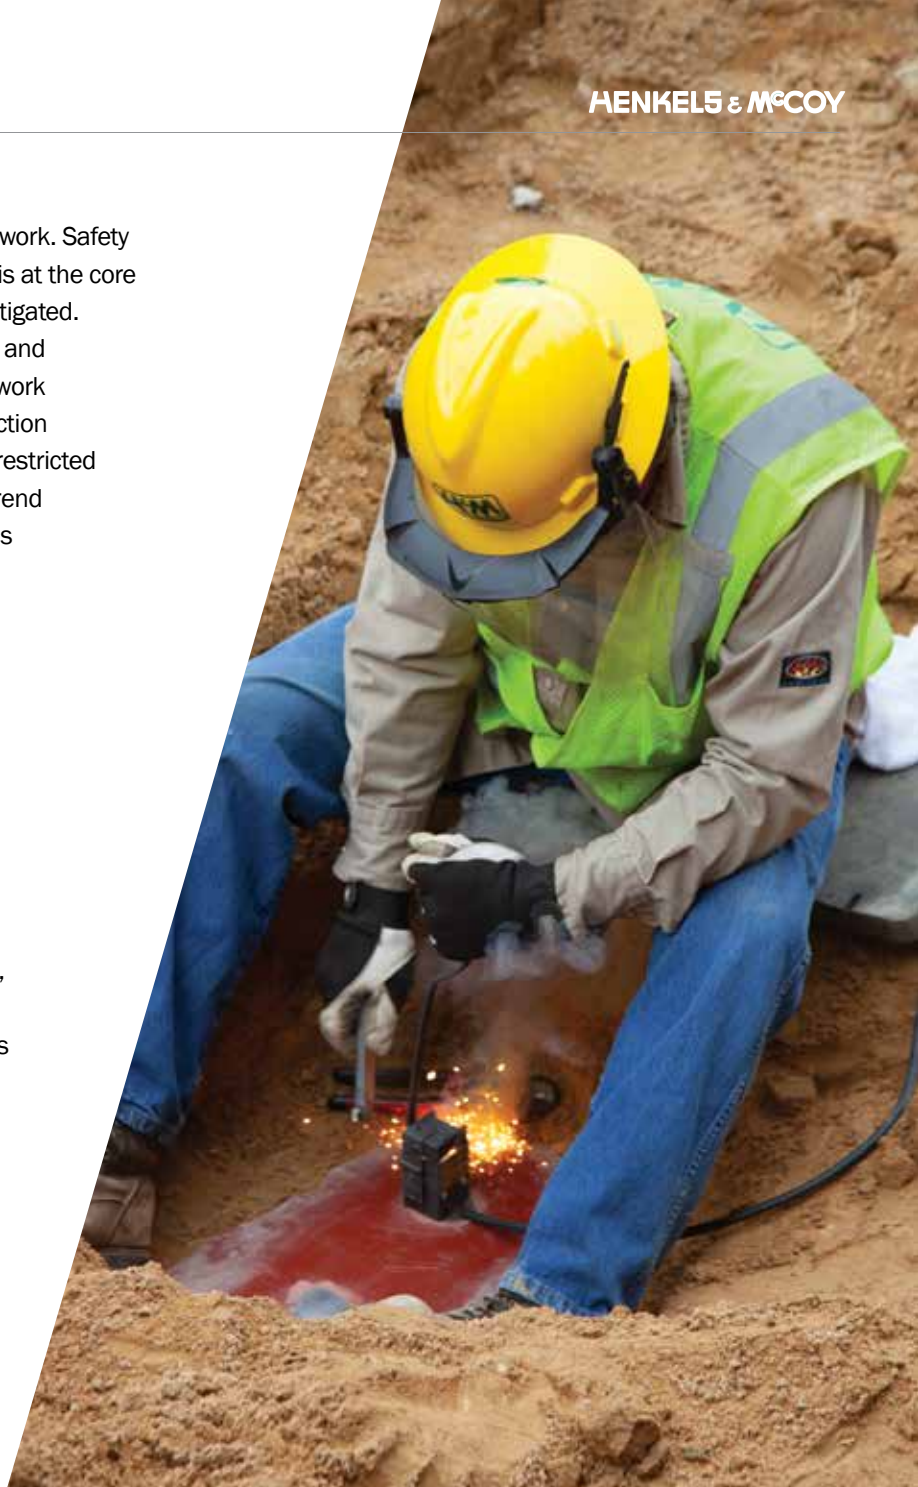

Commitment to Safety

Henkels & McCoy (H&M) extends safety to every aspect of work. Safety drives the development of impeccable work practices and is at the core of the way behavior is observed, communicated, and investigated. H&M follows a daily safety management system of leading and lagging indicators, including coaching observation trends, work site audits, good catch and near miss reports, corrective action follow-ups, total recordable incident rates, days away, and restricted duty and transfers. With these indicators, H&M performs trend analysis and program validation of safety performance. This vigilant evaluation and implementation of company and industry-wide best practices ensures H&M maintains the absolute highest safety standards to protect our workers, our clients, and the community. H&M's daily mission is to ensure "Nobody Gets Hurt!"

About

Henkels & McCoy is an industry-leading utility construction firm providing critical infrastructure design, construction and maintenance services for the power, oil & gas pipeline, gas distribution, and communication markets throughout North America. Founded in 1923, Henkels & McCoy adapts over 95 years of experience to the dynamic and evolving infrastructure needs of today. Henkels & McCoy has been recognized with an E. I. DuPont Safety Excellence Award and is a founding member of the Electrical Transmission & Distribution Partnership, a collaborative industry partnership working to reduce fatalities, injuries, and illnesses in the electric line construction industry.
